

Human Resource Software

Atlas Business Solutions provides PC-based, human resource management solutions that let you easily manage staff information and prepare human resource documentation. Our intuitive and affordable HR software saves time, reduces paperwork, eliminates the need for paper file cabinets and multiple spreadsheets, and removes the need to create human resource documentation from scratch.

Over 10,000 HR administrators, department managers, supervisors and business owners rely on our human resource software to effectively management employee information and HR documents.
