

SAGE ABRA

Product Description

The nGenX managed hosting service provides a perfect complement to Sage Abra HRMS software. Typically, to deploy Sage Abra software, clients must install, house and manage a computer server. This is no easy task, and it requires a large investment of time from their IT staff – in fact, maintaining software can cost up to four times the initial investment. nGenX provides Sage Abra software in a virtual environment, thereby eliminating the need to deploy a server. Instead, clients access their licensed Sage Abra software and corresponding data remotely from the nGenX data center.

Other Supported Sage Abra Products

- Sage Abra Payroll
- Sage Abra Human Resources

- Processor – Distributed Intel Xeon Multi-core processors
- Operating System – Windows Server 2003

Features & Benefits

Item	Feature	Benefit
Low, Fixed Monthly Cost	<ul style="list-style-type: none"> Our managed hosting is a subscription-based service with a low installation fee. 	<ul style="list-style-type: none"> Our hosting service lowers the Total Cost of Ownership as clients won't have to worry about upgrades or maintenance. Additionally, as a service, there are no necessary upfront or on-going capital expenditures.
No Additional Bandwidth Needed – Server Side only	<ul style="list-style-type: none"> The necessary bandwidth for the client's end users is included. 	<ul style="list-style-type: none"> Clients won't have to worry about whether their current bandwidth will accommodate their use of this service.
Secure Managed Hosting from a World-Class Data Center	<ul style="list-style-type: none"> The nGenX data center is served by an HP server farm and Cisco's top-of-the-line routing equipment. Our service and data center are SAS 70, Type II certified. 	<ul style="list-style-type: none"> Clients will feel safe knowing they are storing their critical Human Resources data in a world-class data center. The nGenX data center supports both Sarbanes-Oxley and HIPAA compliancy measures.
Data & Applications Monitoring & Back Up	<ul style="list-style-type: none"> All data and applications are monitored 24/7/365 and backed up daily, weekly and monthly to an off-site location. 	<ul style="list-style-type: none"> Clients will never have to worry about creating, storing, cataloging or accessing back ups disks or tapes.
No Equipment to Deploy or Manage	<ul style="list-style-type: none"> This service eliminates the need to install or maintain a server. 	<ul style="list-style-type: none"> Clients can free up their IT group or resources for other projects as they won't need to devote time to their Sage Abra software installation or its maintenance.
Anywhere Access to Data	<ul style="list-style-type: none"> Clients can access their data from any computer using any broadband connection. 	<ul style="list-style-type: none"> If a client's business experiences a disaster, natural or otherwise, it will always be able to connect to its Sage Abra software and data by accessing the Internet. Remote users and traveling employees can easily access Sage Abra from any computer.
Cost Effectively Expands with Your Business	<ul style="list-style-type: none"> The nGenX managed hosting service can grow or contract very quickly as it's provided as a service without deploying servers. 	<ul style="list-style-type: none"> As clients purchase their service on a user by user basis, they can quickly scale up without a large capital outlay or scale down without wasting resources.
24/7/365 Support & 99.9% Uptime	<ul style="list-style-type: none"> Our customer service team supports our clients around the clock. 	<ul style="list-style-type: none"> We guarantee 99.9% uptime so clients will never be waiting on us. But, if they do need us, we stand ready to support them.
A Fully Inclusive Hosting Package	<ul style="list-style-type: none"> Includes Sage Abra ESS, eRecruiter, Attendance and others without purchasing additional seats. 	<ul style="list-style-type: none"> Our hosting service fully supports every module of the client's Sage Abra software, simplifying its use.
